

# TEST AUTOMATION TRAINING

Become a sought-after expert in software testing!

## ARE YOU:

- Interested in programming and have experience in an object-oriented programming language?
- Motivated to develop yourself further in QA processes?
- Ready to learn new technologies and continuously develop your skills?

## THEN APPLY NOW FOR OUR 6-MONTH TEST AUTOMATION TRAINING COURSE!

In this practice-oriented training course, you will learn everything you need to be successful as a test automation engineer:

- Fundamentals of test automation
- Established test automation frameworks
- Scripting languages such as Selenium and Cypress
- Creation and execution of automated tests
- Troubleshooting and error correction
- Best practices in test automation

After completing your training, you will have the necessary knowledge and skills to work on a QA project and develop test automation solutions independently.

## You also receive:

- Preparation for ISTQB Foundation Certification
- Preparation for ISTQB Automation certification
- Support with the job search

## Prerequisites:

- Basics of an object-oriented programming language
- Motivation and willingness to learn
- Willingness to work independently
- English, German (nice to have)

**DURATION: 6 MONTHS**

**START DATE: APPLY TODAY!**

We look forward to receiving your application!
